

ROKIB AL DHIN RAADH

raadxbusiness9@gmail.com | rokib@blackbloxie.com | raadh.me | oxiedo.com

Founder & CEO of OXIEDO. Inventor of ORMAS, a training architecture that diagnoses, attributes and repairs its own failures — licensed to institutions whose data cannot leave the building.

Publications & Technical Reports

R.A.D. Raadh. “ORMAS: Neural Architectural Transparency Enables Autonomous Self-Correction.” 2026. Zenodo preprint. DOI: [10.5281/zenodo.21730363](https://doi.org/10.5281/zenodo.21730363).

Open-access preprint (v4, 1 August 2026); under double-blind review.

Recent Academic Service & Recognition

- | | |
|----------|---|
| Dec 2026 | Reviewer, Program Committee
Trustworthy AI for Good (AI4GOOD) Workshop — NeurIPS 2026 , Paris <ul style="list-style-type: none">Peer review for the workshop’s trustworthy-AI track, covering mechanistic interpretability, attribution, post-deployment monitoring and model auditing.The ICML 2026 edition of the workshop drew 539 submissions against a 34% acceptance rate, assessed by a committee of 237 reviewers. |
| Jul 2026 | Cosmos Institute — Grants Review
Application ranked highest in its cycle . The round was dedicated to philosophical work on AI; invited back for the technical track. |

Accelerator & Venture Selection

- | | |
|--------------|--|
| Sep 2026 | Freshmango — Accelerator, Estonia <i>Accepted</i>
Offered a place after a twenty-minute interview. No equity, no fee : 5,000-founder network, \$4M in AI credits, introductions across 160 venture funds . |
| Sep 2026 | 1752vc — Ignite Cohort <i>Accepted</i>
Top 5% of the applicant pool, then a final round to select the top 1% ; offered a place in the Ignite cohort. |
| Aug–Sep 2026 | Entrepreneur First — The Bridge, San Francisco
First screen with EF’s London team, August 2026; advanced through two interview rounds for The Bridge , EF’s eight-week San Francisco residency for technical founders. |
| Sep 2026 | Antler — Initial screening passed
Process ended on eligibility, not assessment: Antler’s Australian programme is limited to Australian citizens and founders with permanent Australian working rights. |

Research Experience

- | | |
|------------|---|
| 2024–pres. | Independent Machine Learning Researcher
ORMAS: Neural Architectural Transparency Enables Autonomous Self-Correction
PyTorch · 37,000 lines of research infrastructure · code available to reviewers on request <ul style="list-style-type: none">Three-signal training architecture: unmodified global backpropagation, a per-node local loss through a shared 4,416-parameter bottleneck, and a health-gated correction engine with 8 diagnoses, each capped and logged.First Input-to-State Stability characterisation for a self-correcting architecture; correction rate decays from 4.2 to 0.05 per epoch, consistent with the stability analysis.Recovery from mid-training structural collapse: 80.3% against a parameter-matched baseline stuck at 10.0% permanently, on every seed (+70.3 pp).Retention through sequential task shift with no replay buffer and no task ID: 94.6% against 47.3% for ResNet-18; 58.8% zero-shot on unseen combinations against 25% chance.383 controlled experiments, 4 architecture families, every run reproducible from seed, single RTX 3090. One adverse result published: 1.0 pp below baseline under adversarial weight injection. |
|------------|---|

Engineering

2023–2025	Sole Architect & Engineer OXIMO — Cognitive Multi-Agent Operating System Python · 40,933 lines production · 2,069 tests - Multi-agent operating system: hierarchical task decomposition, on-demand role creation via a self-hiring pipeline, Graph-of-Thoughts planner, three-tier memory with temporal decay, and a seven-check input safety cascade. - Rebuilt from a 106,000-line monolith to 40,933 lines — a 72% reduction with all 12 critical algorithms ported and 2,069 tests passing.
-----------	--

Companies

2023–pres.	Founder & CEO <i>OXIEDO</i> — oxiedo.com Licensing ORMAS to institutions holding data they cannot currently train on. - One architecture under one licence, deployed on customer infrastructure. Five sectors in scope: AI training, regulated finance, medical AI, data-deletion obligation, and defence. - Pre-seed. Incorporating as a Delaware C-corporation, headquarters moving to San Francisco. Accepted into 1752vc Ignite and Freshmango.
2024–2026	Founder <i>Black Bloxie LTD</i> — UK registered A live company run as a controlled test environment for OXIMO. - Registered a UK company at 17 from Bangladesh, handling formation, AML compliance and cross-border operations independently. - Twelve-month deploy–remove–restore ablation on a live company: output fell 91% on removal and recovered on restoration. 396 paying customers in 10 countries; zero advertising spend, zero human sales hours.
2020–2025	Independent ventures (5) <i>Automated sales · AI development · market tools</i> Five ventures between 12 and 17, each failing at a different layer; the shared finding, that the constraint was coordination rather than capability, is what OXIMO was built to answer.

Technical Skills

ML / AI	PyTorch, PCGrad gradient surgery, ISS convergence theory, noise-robust training, multi-agent orchestration
Engineering	Python (advanced), C++, LaTeX, Docker, FastAPI, SQLAlchemy, ChromaDB, Prometheus, React, TypeScript
Languages	English (fluent), Bengali (native)

Education

Fall 2027	Prospective Undergraduate Seeking admission to pursue research in AI safety and self-correcting neural architectures.
2025–2026	Self-Directed Coursework - Deep Learning Specialization (5 courses), DeepLearning.AI (Andrew Ng). <i>Completed.</i> - MITx AI Programs — 25 courses across AI foundations, precision medicine, sustainable energy and transportation. <i>Certificates in progress.</i>
